DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by *Arunachalam et la* the US Patent No: (US 6,631,122), hereinafter referred to as *Arunachalam*.

Regarding claim 1; Arunachalam teaches a method of providing a packet call service via an Internet Protocol (IP) based network in a wireless mobile communication system, comprising the steps of:

constructing a set of service primitive information including radio channel assignment information in accordance with at least one service class for the packet call service (see Fig. 6, col. 8, lines 13-46);

determining a service primitive combination according to a service class of a packet call based on the constructed service primitive information, if a packet call for at least one mobile terminal is generated (see col. 8, lines 47-53);

assigning to the at least one mobile terminal a radio channel corresponding to the determined service primitive combination (see col. 6, lines 1-12); and

Application/Control Number: 10/017,554 Page 3

Art Unit: 2664

providing the at least one mobile terminal with the packet call service by using the assigned radio channel (see col.5, lines 50-54).

Regarding claim 2; Arunachalam teaches the method of claim 1, wherein the service primitive combination is determined on the basis of service class information of the packet call received from the IP network (see col. 8, lines 54-67).

Regarding claim 3; Arunachalam teaches the method of claim 2, wherein the service class information of the packet call is input by a user of the at least one mobile terminal (see col. 6, lines 1-12, and col. 11, lines 8-30).

Regarding claim 4; Arunachalam teaches the method of claim 1, wherein the service primitive information includes radio channel assignment information for an interactive call (see col. 5, lines 35-53).

Allowable Subject Matter

- 3. Claims 5-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewrite in independent form including all of the limitation of the base claim and any intervening claims.
- 4. Claims 11-18 are allowable.

Contact Information

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Binh Q. Nguyen whose telephone number is 571-272-8563. The examiner can normally be reached on M-F: 9:00 AM - 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wellington Chin can be reached on 571-272-3134. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
